RR711 Atlantic Reclining Side Entry Bathing System

## Best in Class – Features, Quality, Breadth of Product, Price

Rane Bathing Systems has been building quality tubs for healthcare facilities since 1999. They have more standard features than any other manufacturer, including a hydro massage air spa, anti-scald valve, and built-in disinfection system, thus saving you money on costly options. The components and materials are top of the line quality to ensure your bathing system will last for many years. Rane is able to blend this high quality with the lowest acquisition cost in the industry. An emerging institutional brand, Rane tubs are best in class for the following reasons:

- 100% manufactured in Sparta, Tennessee from the highest quality components and materials
- Longest warranty in the industry resulting in lowest cost of ownership
- Available in over ten models including a reclining system, a supine system and a bariatric system giving complete versatility and flexibility in choosing the right products for your facilities
- All models equipped with the CleanRane™ Air Spa system with backflow prevention for infection control
- All Rane institutional tubs come standard with a thermostatic mixing valve for anti-scald protection
- All institutional bathing systems include a built-in disinfectant cabinet
- National distribution and service
- All of these features at a very affordable price

*All Rane institutional bathing systems feature this simple to use control panel which includes the tub fill, CleanRane™ Air Spa control, shower valve, on board thermometer, and anti-scald valve*

*The CleanRane™ Air Spa system features a unique spring loaded check valve that prevents water from seeping into the air lines, thus providing infection control for your residents and easier maintenance for your caregivers*
